REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

In independent claims 1, 11, 17, 18 and 20 directed towards a method of storing data, a method of emulating an electrically erasable programmable read only memory using a flash memory, an apparatus to emulate an electrically erasable programmable read only memory using a flash memory, and a processor-readable media storing instructions for causing a processor to store data, the following features taken in combination with the remaining limitations in the independent claims are not found in and or are not obvious in view of the prior art of record,

Claim 1,

"setting a single second bit of the pointer, the second bit being a next successive bit in the pointer to the first bit, the second bit indicating an address of the second set of contiguous memory locations of the flash memory; and erasing at least the pointer after a last bit in the pointer has been set";

Claim 11,

"for each of the sets of data, setting one respective bit of a number of bits of a pointer stored in the flash memory before storing a next one of the sets of data, the one bit indicative of the location in the flash memory at which the respective set of data is stored; and after a last bit in the pointer has been set, erasing a sector of the flash memory containing the pointer and the stored sets of data";

Claim 17,

"means for setting one respective bit of a number of bits of a pointer stored in the flash memory for each of the sets of data, before storing a next one of the sets of data, the one bit indicative of the location in the flash memory at which the respective set of data is stored; and means for erasing a sector of the flash memory containing the pointer and the stored sets of data after a last bit in the pointer has been set";

Art Unit: 2185

Claim 18,

"(a processor configured) to set one respective bit of a number of bits of a pointer stored in the flash memory for each of the sets of data, before storing a next one of the sets of data, the one bit indicative of the location in the flash memory at which the respective set of data is stored; and to erase a sector of the flash memory containing the pointer and the stored sets of data after a last bit in the pointer has been set";

Claim 20,

"for each of the sets of data, setting one respective bit of a number of bits of a pointer stored in the flash memory before storing a next one of the sets of data, the one bit indicative of the memory location in the flash memory at which the respective set of data is stored; and after a last bit in the pointer has been set, erasing a sector of the flash memory containing the pointer and the stored sets of data".

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Elmore whose telephone number is (571) 272-4436. The examiner can normally be reached on Mon-Fri from 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Kim can be reached on (571) 272-4182. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
